Trương Anh Bằng (Ethan)

Game Designer | Unity Developer

PORTFOLIO See Unity projects and my design work — **Open Portfolio ›**

PROFILE

Hello, my name is **Ethan Truong**, **a game designer and Unity developer**.
Over the past **four years** I have shipped and managed many mobile games to **Android, iOS, Steam and TikTok**. I design the levels, economy and systems, and prototype gameplay for games, which lets me test and adjust how the game plays and feels. I also enjoy cloning games on my free time. I constantly follow of latest **AI** news to improve & speed up my workflow. Open my Portfolio to see each project and my part in it.

CORE SKILLS

Game design: Systems and level design, core loops, progression, economy balancing, onboarding (FTUE), LiveOps, GDDs, playtesting, A/B testing

Development: Unity and C# gameplay, UI/UX implementation, rapid prototyping, WebGL and mobile (Android, iOS) builds, Addressables, performance optimization, Unity Editor tools, Web3 integration, Git.

EXPERIENCE

Game Designer
Sep 2025 – Present

VGames | Full-time

- **Design levels**, **game systems** and features for live mobile games, and write the **GDDs** and specs that developers and artists build from.
- **Tune difficulty**, **economy** and **progression** from player data (**D1/D7 retention**, **ARPU**), and playtest every update before release.
- Run **A/B tests** and **LiveOps** events, and work with **developers** and **artists** to ship each update.
- **Design and refine the FTUE** so new players learn the core loop quickly and stay past day one

Web3 Game Developer - Unity WebGL
Feb 2025 – Jul 2025

Yield Guild Games | Contract

- Built gameplay features for a **Web3 idle game** in **Unity** and **C#** for the **WebGL** pipeline, shipped in the browser.
- Built a responsive, cross-browser **UI/UX** and **cut load time** by optimizing models, sound and images.
- Connected the game to its **Web3** layer, working directly with the team lead and the client.

Web3 Game Developer - Unity 3D
Sep 2023 – Dec 2024

Mavis X (Sky Mavis) | Contract

- Prototyped and built gameplay features for **Axie Infinity**, a **Web3 turn-based game**, in **Unity** and **C#**.
- Built the **UI/UX** screens and a **Figma Importer** Editor tool that imports Figma layouts into Unity automatically.
- Integrated gameplay with **smart contracts** together with the blockchain engineers.

Truong Anh Bang

Game Designer | Unity Developer

EXPERIENCE (CONTINUED)

Game Developer - Unity 3D

Apr 2021 – Jul 2023

Carem Studio | Full-time

- Built **3D mobile games** for Android and iOS in **Unity** and **C#**: gameplay, physics, AI, player controls, UI, menus and input.
- Integrated 3D models, textures, animations and audio, and built a **reusable framework** for the team to build on.
- **Shipped** to **Google Play** and the **App Store** with **analytics**, **ads** and **IAP** SDKs integrated, using **Git** throughout.

QA Automation Developer

2019 – 2020

CaseWare International | Co-op

- Wrote **automated tests** in **Java** and **C#**, and extended the testing **SDK** for cloud integration.
- Ran the tests through **Jenkins** in an **Agile** team, which made testing more efficient.
- Contributed **UI design** for a multi-server cloud feature.

DESIGN SKILLS

Design	Core Loop, Onboarding (FTUE), Prototyping, Wireframes, Flowcharts, Narrative, Player Motivation
Balancing	Economy, Difficulty Curve, Progression, Retention, KPIs (D1, D7, ARPU, LTV, CPI, ROI), A/B Testing
Research	Market Research, Competitor Analysis, Game Deconstruction, User Testing, Dashboards
Process	Agile, Scrum, Rapid Prototyping, Playtesting, Teamwork, Communication

TECHNICAL SKILLS

Languages	C#, C++, Java, Kotlin, Objective-C, JavaScript, SQL, Python
Platforms	Android, iOS, WebGL, AR, Web3, TikTok
Genres	Casual, Hyper-casual, Hybrid-casual, Idle, Tycoon, Merge, Match-3, Puzzle, RPG, Roguelike
Unity	UGUI, UI Toolkit, Addressables, DOTween, UniTask, Cinemachine, Shader Graph, URP, Editor Tools
Architecture	Design Patterns, MVC/MVP/MVVM, SOLID, Clean Code, Code Review, Refactoring, Unit Testing
Performance	Unity Profiler, Memory Profiler, Frame Debugger, GC Allocation, Draw Calls, Batching
Multiplayer	Photon, Mirror, Netcode
Native & Web	Android Studio, Xcode, native plugins, HTML5, Playable Ads, Cocos Creator
Ads & Analytics	AppLovin MAX, AdMob, IronSource, Firebase, Google Analytics, AppsFlyer, Adjust, Unity IAP
Tools	ChatGPT, Claude, MCPs, Unity CLI, Git, SVN, GitHub Actions

EDUCATION

Computer Programming and Analysis

2018 – 2021

Seneca College | Toronto, ON | GPA 3.9/4

PORTFOLIO

Unity projects and game design work, each with my role explained.
